

## **INFORMATION SHARING REPORT**

### **October 19, 2020**

### **Fire Training:**

The Punta Gorda Fire Department would like to recognize Firefighter's, Joshua Roebuck and Jadilyn Duenas, for passing their National Registry Paramedic test. This is the highest level of emergency medical care outside of the hospital. Becoming a paramedic allows you to perform

cardiac rhythm monitoring, obtain intravenous or intraosseous access and administer medications of various kinds. This results in our residents and visitors having a higher level of care prior to reaching the hospital. Out of the 24 on line personnel at the fire department, we now have 22 credentialed paramedics with one more graduating very soon. This is an incredible achievement for any fire department and were proud of our personnel for continuing their education and commitment to serving our community.
